The Peak
Stirling Sports Village

The Brief

INSTOCK was contracted to design and supply two eateries within the brand new Stirling Sports Center, on the outskirts of Stirling.

The brief was to mirror the quality aspect of the building in its eateries and **INSTOCK** provided a ground floor kitchen and café eatery area, served by top quality serve over counters, and a full production kitchen and public bar on the upper level overlooking the ice rinks.

The Project

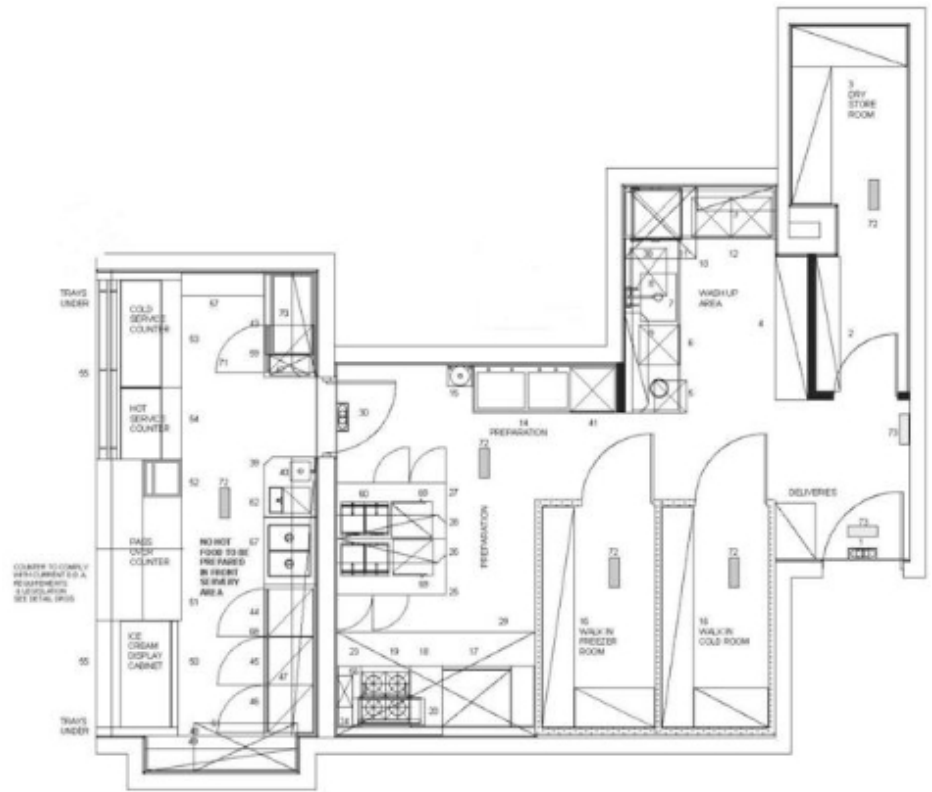

The Peak, Stirling Sports Village

This state of the arts sports venue, designed and built to service the needs of the sporting fraternity in the Stirling and Bridge of Allan areas, offers the highest quality of sports and training facilities for a myriad sporting pursuits, with indoor football pitches, Olympic sized swimming pools, and much more.

The best commercial kitchen appliances were employed, as were walk in chiller and freezer rooms. All first and second fix services were provided by **INSTOCK** along with installation of the equipment, extraction and floor coverings, wall panels and decoration.
