Westmorland
Limited

Tebay South Services

The Brief

INSTOCK was contracted to design, manufacture and install the fit out of an outside 'bothy' facility to offer travellers the choice of eateries within the Westmorland Tebay South Service area.

The Project

Tebay South Services, Westmorland Ltd

A longstanding client of **INSTOCK**, Westmorland Limited have progressively expanded their business of motorway services provision on the M6 for years

Their business has provided travelling motorists with one of the most attractive and varied food and rest stops in England.

Their wish to continue this varied choice for travellers resulted in the addition of an outside 'bothy' facility, which offers an an attractive and popular 'barbeque' type menu without the need to go inside and sit down in their already popular dining facilities.

INSTOCK were asked to design, manufacture and install the fit out of this facility, all of which was completed in a short period, with the unit being open six weeks, from start to finish.
